SKILLS
Python programming
Google Cloud Platform
GCP BigQuery
Snowflake and Teradata
Adaptive Learning
Data pipeline design
ETL development
Backup and recovery
Data visualization
Advanced SQL with GenAI
Data warehousing

PROFESSIONAL SUMMARY

Results-driven Senior Data Engineer at LTIMndtree with expertise in Python programming and data pipeline design. Proven track record in enhancing data systems through innovative ETL solutions and advanced SQL techniques. Adept at collaborating with cross-functional teams to deliver impactful data visualizations, ensuring data integrity and stability in complex projects.

WORK HISTORY

June 2022 – Current
Senior Data Engineer, LTIMndtree, Chennai, India

• Collaborated with cross-functional teams to define requirements and develop end-to-end solutions for complex data engineering projects.
• Evaluated emerging technologies and tools to identify opportunities for enhancing existing systems or creating new ones.
• Collaborated on ETL (Extract, Transform, Load) tasks, maintaining data integrity and verifying pipeline stability.
• Compiled, cleaned, and manipulated data for proper handling.
• Developed polished visualizations to share results of data analyses.

EDUCATION

April 2022
Bachelor Of Engineering, Computer Science And Engineering
RMD Engineering College, Chennai, India

GAMING AND TECHNOLOGY

Possesses a strong technical aptitude paired with a keen eye for user experience. Whether it's building a custom PC or optimizing a game's settings, I focus on efficiency and seamless performance. This translates to an inherent ability to troubleshoot, perform root cause analysis on technical failures, and provide intuitive user-centric solutions to problems.
